

PRESS RELEASE

THE PIAGGIO MP3 LIFE SUPPORT FOR THE ITALIAN RED CROSS

THE EMERGENCY MEDICAL VERSION OF THE 3-WHEELED SCOOTER WAS PRESENTED IN ROME AT
THE CELEBRATION FOR THE 30TH ANNIVERSARY OF THE 118 SERVICE

Pontedera, 25 March 2022 - The three-wheeled scooter **Piaggio MP3 Life Support** used by the **Italian Red Cross** was presented at the **30th anniversary celebration of the Italian National Territorial Emergency Service (118)**

In comparison with the classic Piaggio MP3, its equipment includes flashing LED lights and front sirens, an electric telescopic pole with a 360° flashing LED light and highly reflective stickers. In addition, the combination of the top box and side bags increases the load capacity to 142 litres, making it the ideal vehicle for easily transporting medical equipment for pre-hospital first aid, including BLS (Basic Life Support) and ALS (Advance Life Support), defibrillators, immobilization collars, dressing sets, oxygen cylinders, respiratory kits and infusion sets.

The **Piaggio MP3 Life Support** is already **used** by the national territorial emergency services of several countries, including the **United Kingdom, France, Australia** and especially **Israel**, which has made it a real feather in the cap of its First Aid fleet, with over **650 vehicles at its disposal**.

The **Piaggio MP3 Life Support** supplied to the **Italian Red Cross** represents **one of the first applications of this vehicle for emergency services in Italy**, made possible thanks to amendments to the Highway Code converting DL121 at the end of 2021, which allow motorbikes to be used for first aid services (transport of medical personnel and medical equipment).

Thanks to the characteristic compact size, safety and stability of the **Piaggio MP3 Life Support**, **intervention times are reduced, making a difference in first aid situations where time is of the essence**.
